**HILL FLORAL PRODUCTS CO., Richmond, Indiana**

Distributors for THE E. G. HILL CO. THE JOSEPH H. HILL CO. FRED H. LEMON CO.

**T**HIS year, for the first time since 1934, we have a number of new Rose varieties to offer you. The planting of new varieties stimulates buying by giving the public something different, new names to ask for, and new colors to enjoy. Leading the list of such Roses we have Lestra Hibberd, our sensational yellow seedling of Sweet Adeline × Joanna Hill, followed by Happy Days, Signora, Chieftain, and William F. Ekas.

We suggest that you keep your planting up to scratch with these introductions and purchase your plants from us. Last year there were enormous losses suffered in grafting boxes by many in all parts of the country, and few people profited by grafting. We are equipped to graft your requirements for you efficiently, and to supply you with a wide choice in quality plants. Let us graft your needs.

# ROSES FOR 1937

## LESTRA HIBBERD

The Jos. H. Hill Co.

U. S. Plant Patent No. 156, Dec. 3, 1935.

Back in 1929, eight years ago, we disseminated a new seedling rose, Joanna Hill. We now have another fine seedling, Lestra Hibberd, resulting from a cross between Sweet Adeline and Joanna Hill. From the latter parent Lestra Hibberd gets its interesting color shadings. The bud is dark yellow, the open bloom orange-yellow, tinted with creamy white, becoming at times a light amber yellow. Lestra Hibberd is a real grower and in production it ranks among the best. Our records from our large planting prove that it can do better than twenty-five flowers to the plant. This is remarkable when the large size of the flower is considered. Plant some of the outstanding new rose of this year.

## SIGNORA

Jackson & Perkins Co.

U. S. Plant Patent No. 201, Oct. 13, 1936.

Signora is a beautiful Italian seedling rose of the novelty class that is commanding attention among all florists. It has a long, pointed bud, brownish-orange overlaid with pure orange. The bloom opens slowly and perfectly, showing a general color of orange flame. Foliage is often favorably commented upon but on Signora one finds as handsome, glossy foliage as can be imagined. It adds much to the attractiveness of the flower as a whole. Another truly outstanding feature of Signora is its ability to throw a long stretch from cut or pinch. Best grown in temperature two or three degrees cooler than average rose temperature.

## CHIEFTAIN

The Montgomery Co., Inc.  
U. S. Plant Patent No. 150, Nov. 26, 1935.

Chieftain, a seedling resulting from a cross of Hadley x Talisman, closely resembles Hadley but is a brighter and lighter red. The color qualities of Talisman appear at the base of the bud, diffusing a small amount of yellow into the red of Chieftain, giving it a slight orange glow.

Chieftain has proved to be a good keeper and in this way has overcome the usual objections to an otherwise fine red rose. We have experienced such a steady demand for this rose that we have not been able to supply enough Chieftain cut flowers to take care of our trade, although we have planted over 11,000 plants.

## HAPPY DAYS

Amling Rose Co.  
U. S. Plant Patent No. 144, March 2, 1935.

Happy Days is a deep pink sport of Briarcliff which appeared at the Amling rose range at Pana, Illinois, in 1932. To go into a minute description of this rose is unnecessary as it would only be describing the well-known rose, Briarcliff, with the one exception of the color. It is a darker rose than Briarcliff, yet does not in any way fall into the Better Times color field.

In 1935 a large planting of this rose produced an average of 26 blooms per plant and, due to its intensive color, the cut averaged considerably more per bloom than Briarcliff.

For the first year of dissemination Happy Days is priced right and a place should be made in your houses for a planting of this rose.

## WILLIAM EKAS

F. E. Cremer, Florist  
U. S. Plant Patent No. 177, May 12, 1936.

William Ekas is a sport of Souvenir. The color, apricot salmon when open, outer petals tinge to pink. The rose can be cut when tight as it will develop perfectly. The petals number around 40 per flower and when fully opened the flower measures three inches or more. Its cultural habits are identical with Talisman. As it is a strong grower it will cut some bullheads off the first fall crop, which will not again appear during the summer and fall months on second year plants.

# SINGLES AND ANEMONES

Will add interest and variety to your collection.

## SINGLES

**MRS. WILLIAM BUCKINGHAM.** This variety has been tried for years, and, in our opinion, remains today the peer of all the single pinks. It is a lovely shade of rosy pink, and the retailer will find it most valuable. It flowers around the first week in November.

**BRONZE BUCKINGHAM.** A beautiful bronze sport of Mrs. William Buckingham. Its habit of growth and blooming period are similar to its parent.

We recommend it highly. A variety usually in heavy demand for baskets and vase arrangements.

**TAGOYA.** DePetrís introduction of 1936. An outstanding single producing rigid, well-formed sprays with flowers of excellent substance. Its color is a brilliant goya red overlaid with a rose sheen forming a brilliant and very attractive combination. Somewhat dwarf; suitable for pot plants. Can be grown either disbudded or as a spray. Matures Nov. 1st to 5th.

## ANEMONES

**BETTY ROSE.** A large-flowered Anemone suitable for disbudding, maturing October 25. Color an even shade of deep lavender-pink throughout, with full rounded cushion.

**CRIMSON GLOW.** Late crimson-maroon which should be disbudded for best results. Easily grown variety with excellent stem and foliage. Matures November 20.

**GARZA SUPREME.** This improved form of Garza is a valuable addition to the list of Anemones. It is pure white, graceful in habit, but, most important, it comes into bloom in December and can be held over into January. Exceedingly valuable for the retail grower. A wonderful keeper.

**MRS. ALFRED G. WILSON.** A pure white, very free in growth and bloom. Requires very little disbudding. Blooms November 5.

**NORMA.** Large-flowering, orchid-pink Anemone with golden pink cushion, making a very striking

combination. Individual flowers average 4 to 5 inches across. Matures November 20.
